## BioWorks Announces Expanded Label for MilStop<sup>®</sup> Broad Spectrum Foliar Fungicide

**Victor, New York** (September 1, 2005) – BioWorks, Inc. announces that **MilStop Broad Spectrum Foliar Fungicide** received approval for expanded crops and usage. The following label changes were approved:

- **Low rate reduced** – greenhouse use: 1.25 lb/acre; field use 2.0 lb/acre
- **User friendly rates** - pounds/100 gallons and a small volume application rate chart
- **Low volume** sprayer use rates and instructions
- **PreHarvest Interval** (0 – day) specified
- **More crops added:** Begonia, Clematis, Daylily, Fir, Gerbera daisy, India Hawthorn, *Photinia*, Spruce, Ginseng, Tobacco
- **Additional diseases added:**
  - Ornamental - Downy mildew, Monilinia fruit and blossom rot, *Penicillium* spp., and Rust.
  - Agriculture – Cercospora leaf spot, Fly speck, Monilinia fruit and blossom rot, *Penicillium* spp., Phomopsis blight, Scab, and Septoria leaf spot

MilStop is a foliar-applied contact fungicide that works well in an integrated program with BioWorks' biofungicides PlantShield<sup>®</sup> HC and RootShield<sup>®</sup> Granules, as well as all other commonly used fungicides. MilStop has a 1-hour REI, built-in surfactants and is conveniently packaged in 5 pound and 25 pound plastic buckets. MilStop is a very cost-effective product to cure and prevent Powdery Mildew, as well as prevent many other foliar diseases.

BioWorks, Inc., a privately held company, provides environmentally responsible, safe and cost-effective solutions to the agriculture industry. BioWorks is a founding member of the BioPesticide Industry Alliance.
