

**BioWorks Announces Expanded Label in California for
MilStop[®] Broad Spectrum Foliar Fungicide**

Victor, New York (January 15, 2006) – BioWorks, Inc. announces that **MilStop Broad Spectrum Foliar Fungicide** received approval for expanded crops and usage in California. The following label changes were approved:

- **Now labeled on ornamental, greenhouse and agricultural crops.**
- **Expanded disease spectrum:** Alternaria leaf spot, Anthracnose, Botrytis, Downy mildew, Fusarium, Phoma, Phytophthora, Powdery mildew.

MilStop is a foliar-applied contact fungicide that works well in an integrated program with BioWorks' biofungicides PlantShield[®] HC and RootShield[®] Granules, as well as a rotation partner for other commonly used fungicides. MilStop has a 1-hour REI, built-in surfactant, and is OMRI Listed for organic uses. It is conveniently packaged in 5 pound and 25 pound plastic buckets. MilStop is a cost-effective product for cure and prevention of Powdery Mildew, as well as prevention many other foliar diseases.

BioWorks, Inc., a privately held company, provides environmentally responsible, safe and cost-effective solutions to the agriculture industry. BioWorks is a founding member of the BioPesticide Industry Alliance.
